

## **FTOC Peer Review**

**Quality of Work:** (3 points) The code looks like it is well developed, I have limited knowledge of Python, which was used for more statistical use, but your code looks great.

**Intellectual Merit:** (3 points) The Project looks interesting and can't wait it see how it turns out. It sounds like a great way to learn about UWRF in a fun way.

**Video:** (3 points) Explains the code step by step well so others can understand it.

**Quality of Outline:** (3 points) Gives a great explanation of what you are doing, why you are doing it, and how you are going to do it. It also explains the problems you have and how to fix it. Very detailed.

**Intellectual Merit:** (3 points) Showed great knowledge of the project and what you are doing and plan to do. A good example of what an outline should look like.

**Video:** (3 points) Went through the outline and explained it well. Clear, calm, and easy to understand.
