Peer Review For FTOC

Quality of Work: 3

The only thing I really have to add, I would recommend adding some comments to your code. Good habit to get into especially since it's a project being shared with people that don't get the first sight on what's happening.

Project Progress: 3

You showed in your video that everything that you've been working on and highlighting for milestone 2 is working and the code is nicely organized.

Video: 3

Like I said, the video does a great job at showing everything. It's really cool to see what you've been working on since I have no real experience with coding in python or game dev.
